

SUMMIT CARDIOLOGY AT UW MEDICINE IN BALLARD

Expert care in the heart of your neighborhood

At Summit Cardiology, our expertise extends from early prevention and risk assessment to acute and chronic disease management.

While much of our work involves the use of leading-edge technology and techniques, we understand that successfully treating and healing the heart involves more than just technology. It involves personalized care presented thoughtfully to fit the individual needs of each patient.

At our Ballard office, our team of physicians offers a broad range of general cardiology services, including:

- Preventive and consultative services
- Cardiac risk assessment
- Symptoms assessment including chest pain, shortness of breath, and palpitations
- Coronary artery disease management
- Arrhythmias diagnosis and management
- Valvular heart disease
- Cholesterol management
- Hypertension and other blood pressure problems

Comprehensive care

Our patient-centered cardiovascular specialists are recognized for the quality of care we provide in both clinic and hospital settings. Our practice is fully integrated with Northwest Hospital & Medical Center and University of Washington Medical Center, where we provide additional advanced services including:

- Diagnostic and Imaging Services
- Cardiothoracic surgery
- Interventional cardiology and structural heart procedures
- Electrophysiology services including device and ablation therapies
- Congestive heart failure care and heart transplantation
- Adult congenital heart disease care

Meet the provider

CHETAN PUNGOTI, MD

Dr. Pungoti earned his medical degree from Rosalind Franklin University of Health Sciences at The Chicago Medical School and completed his residency and cardiology fellowship at Mount Sinai Hospital in New York, where he received specialty training in echocardiography, nuclear cardiology, diagnostic cardiac catheterization, and vascular ultrasound.

Dr. Pungoti is dedicated to help his patients achieve optimal health by incorporating clinical excellence with state-of-the-art technology. He believes in providing compassionate care through open communication, respect, and understanding for your concerns.
